

ENERGY

Power Consumption Analytics

WHAT IS **ATAMAI** PLATFORM ?

ATAMAI is a groundbreaking technology Platform to **Transform** traditional **Andon Systems & Energy Meter** into **intelligent, data-driven** solutions to bring production efficiency & cost reduction at any industry

ATAMAI Energy is analytics software platform, to provide insights about real time power utilization, consumption patterns, power factors & voltage variations across each area or department in any industry.

In Japanese, "**Atamai**" translates to "**Smart**," and "**Andon**" translates to "**light**."

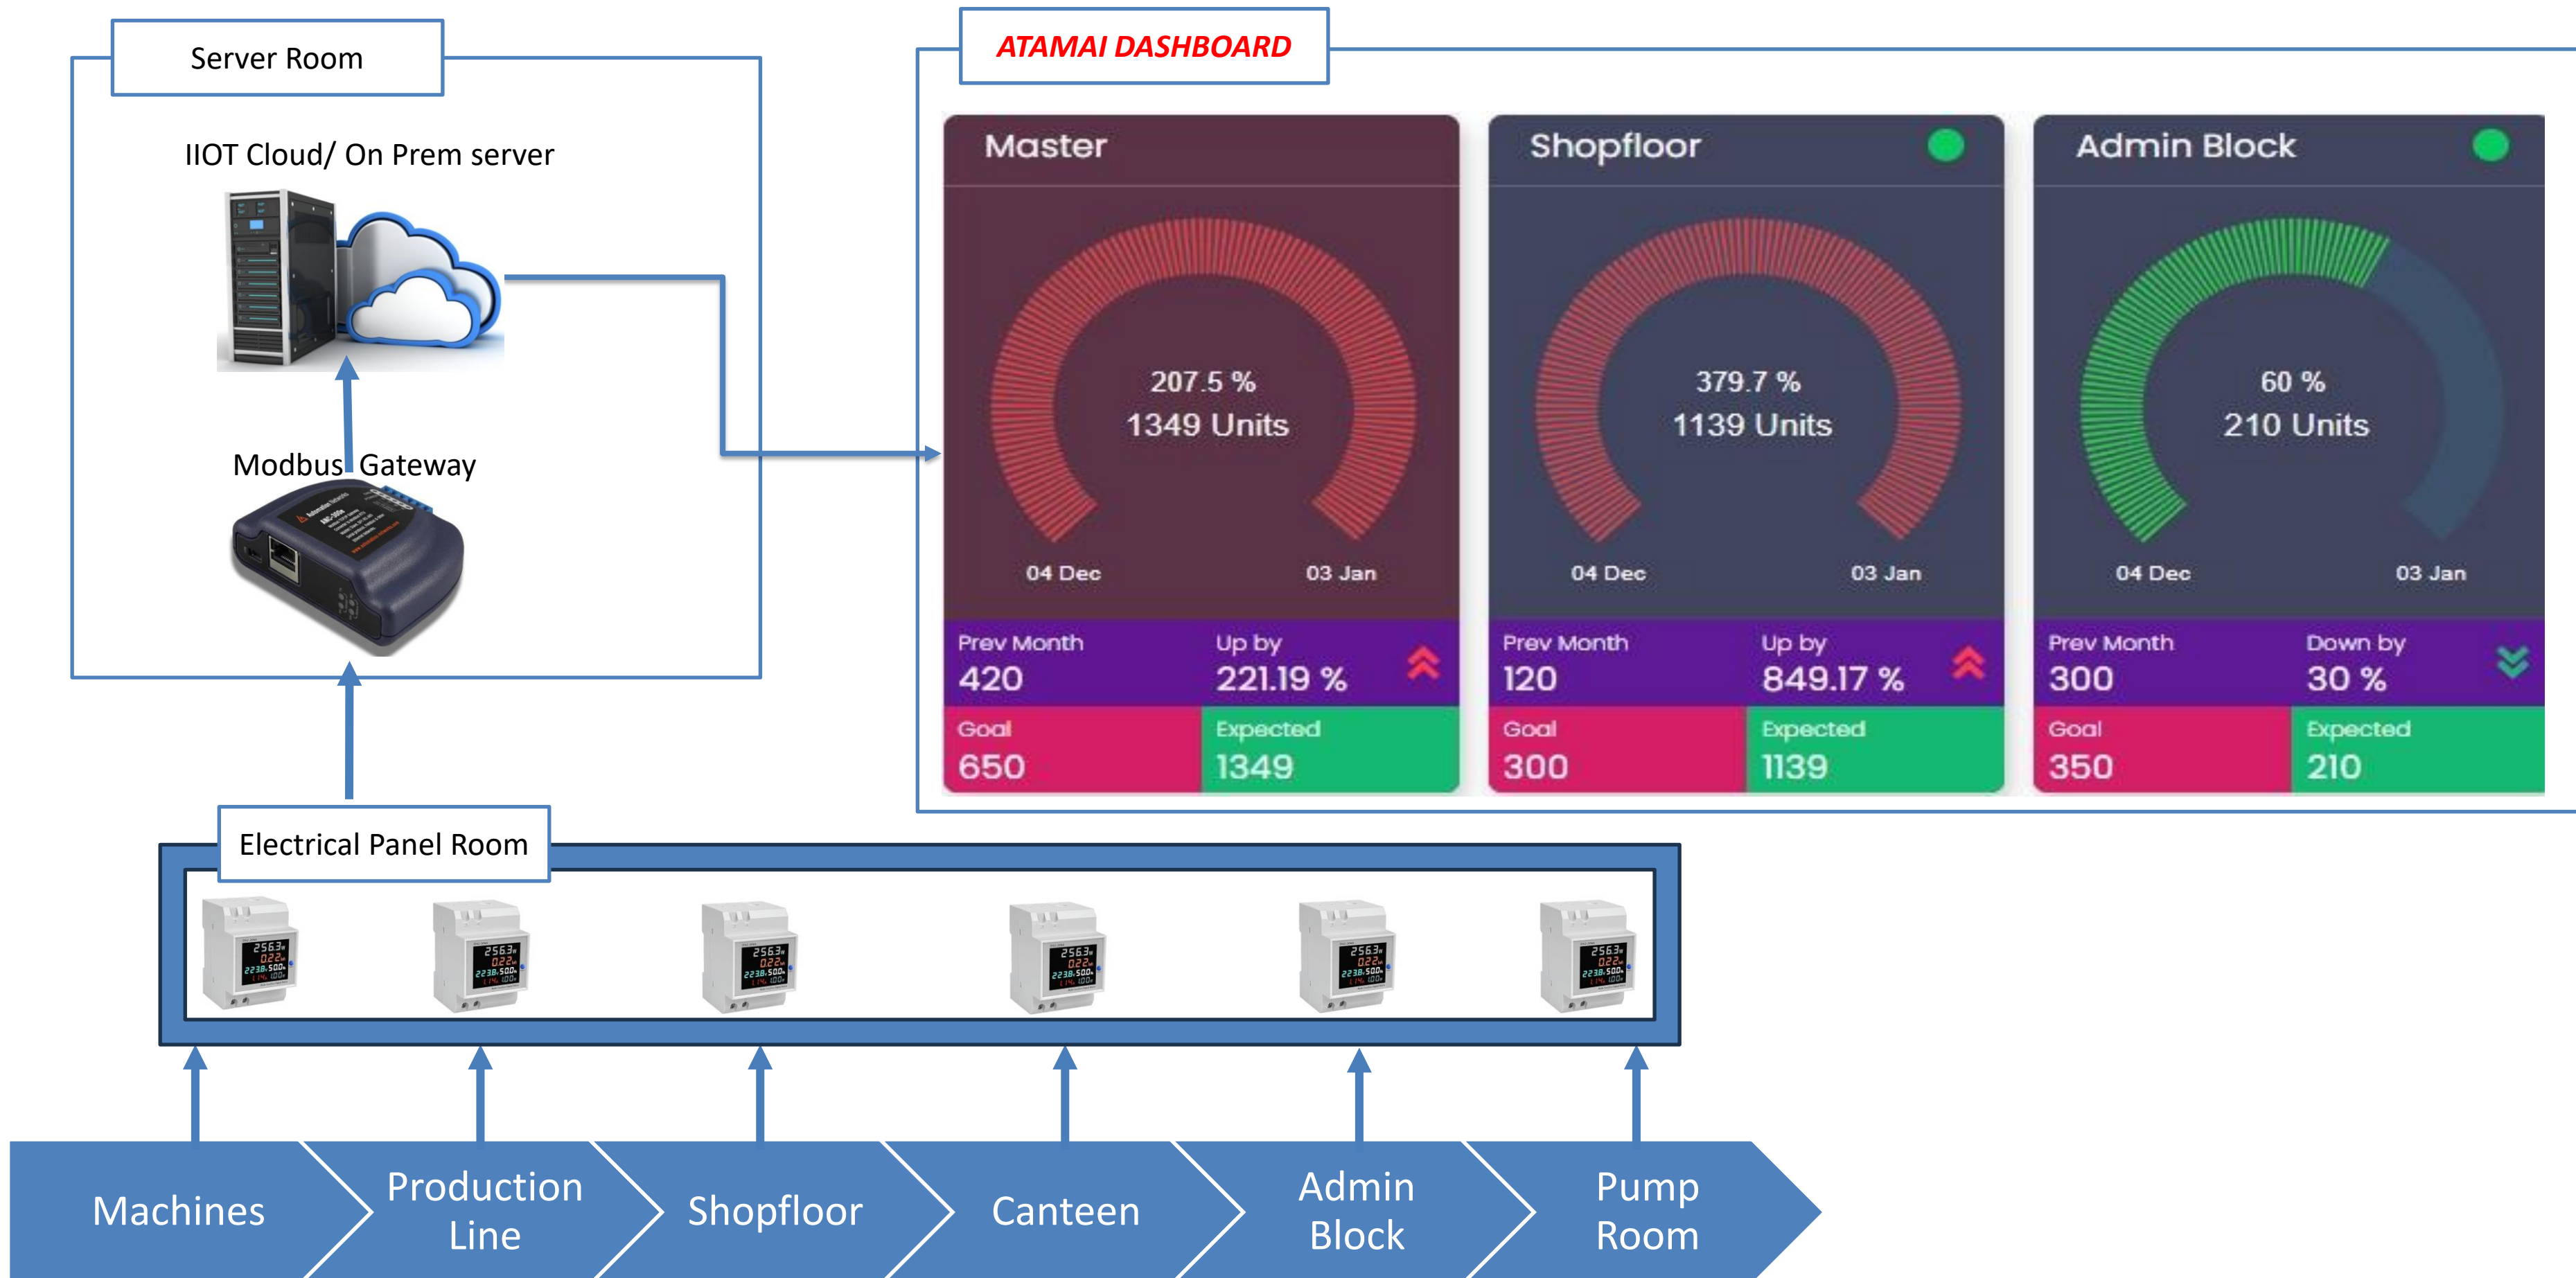

CURRENT INDUSTRIAL CHALLENGES AND SOLUTION

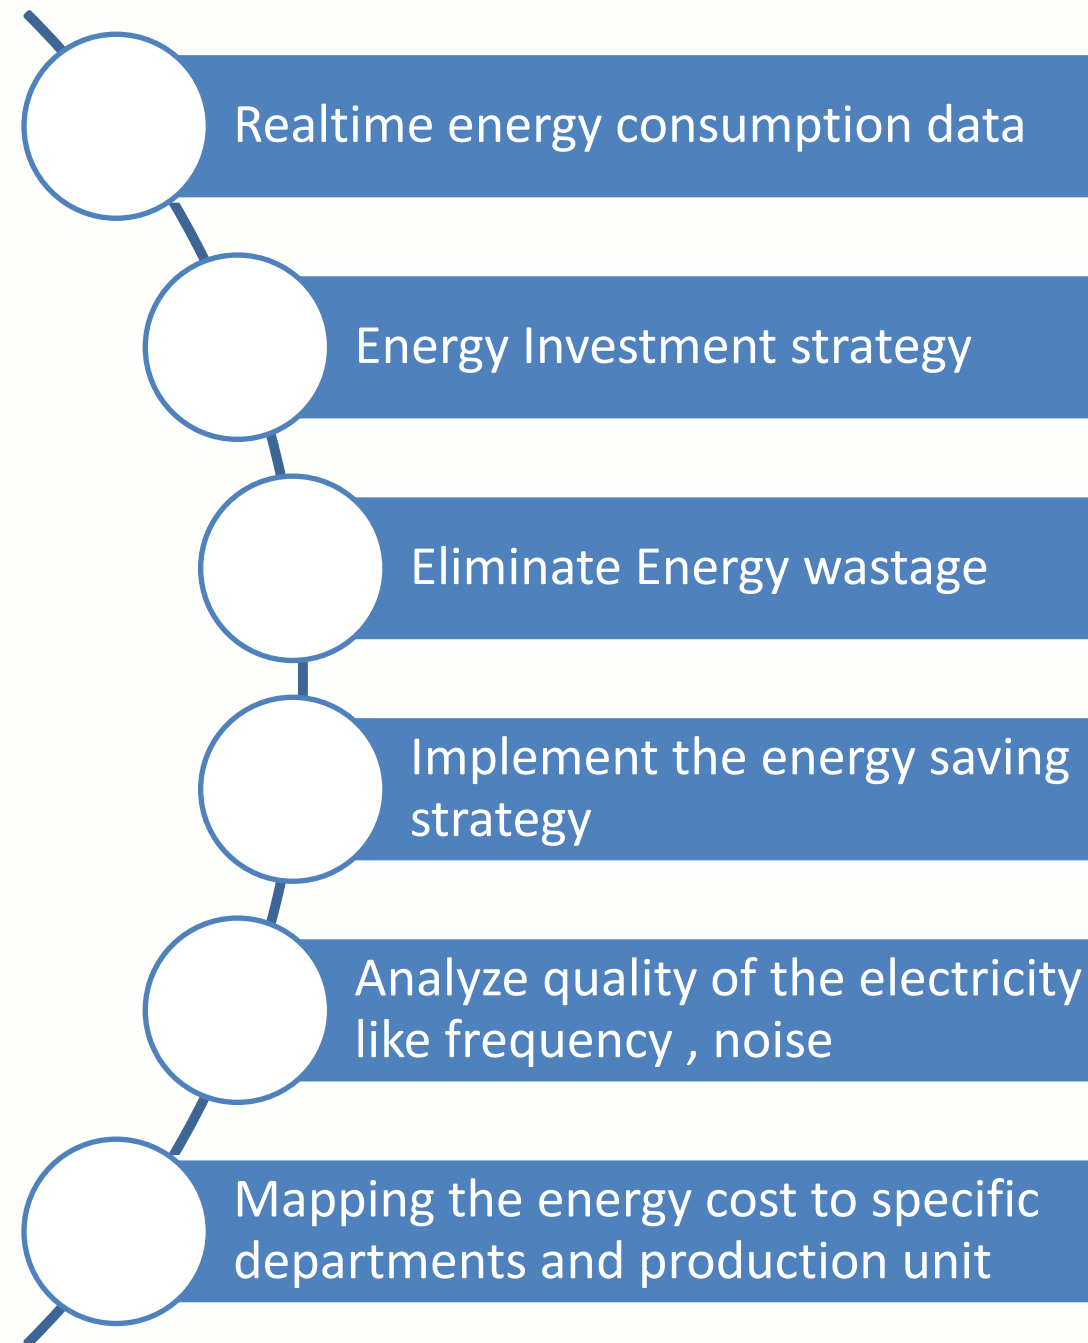

- High Power consumptions & waste of energy
- Track of energy consumption in each division
- Aggregated usage of energy consumption plan and usage
- Proper planning on power consumption
- Measuring and recording the energy consumption to check whether your current energy is better or worse
- Comparing energy consumption to check specific areas of wasted energy
- Comparing energy consumption to an appropriate standard or benchmark
- Setting targets to reduce or control energy consumption

As per Bureau of Energy Efficiency The monitoring and Targeting programs have been so effective that they show typical reductions in annual energy costs in various industrial sectors between 5% to 20%
